

- **Hamilton Health Sciences – Temporary Hospital:** In one week HCE Telecom installed fibre for the temporary Non-Covid19 hospital that is being established at the Sheridan Hotel to enable the significant communications that will be required for that facility and Hamilton Health Services.
- **City of Hamilton Public Works - Remote Command Centre:** HCE Telecom have developed and deployed 20 wireless access points that enable remote command and control for of public works water infrastructure so workers can securely control this critical infrastructure system from home.
- **City of Hamilton - Emergency Responders:** HCE Telecom are in the final stages of deploying network infrastructure for new wireless network technology which is quickly being deployed to provide improved wireless services to the emergency services vehicles in Hamilton
- **City of Hamilton – Homeless Shelter at First Ontario Centre:** The District Energy company, HCE Energy have been able to accelerate the cooling schedule at the First Ontario Centre as it is being setup as a homeless shelter with approximately 50 beds

You can contact Andrew for more information on any of these initiatives.
